

# SCIENCE OLYMPIAD *is for* **Administrators**

Science Olympiad helps you to achieve many of your goals as an **administrator** by enhancing STEM education programming, building community buy-in and recognition for school achievements, and engaging students with hands-on experiences that prepare them for college and beyond. Students specialize in subjects of their choice, from bio to chem to tech and engineering, while teachers get to work with kids who've raised their hand and said **YES to science**.

Each fall, Science Olympiad releases new rules for 23 STEM-related competitive events. Students pair up and tackle the building devices for on-site testing, studying for core knowledge challenges, and preparing for rigorous hands-on lab experiments. School teams register annually through their state Science Olympiad chapter, for a great value compared to other top STEM programs.

**SCIENCE  
OLYMPIAD  
IS FOR YOU**

Find out why a science teacher at Whitefish High School in Montana thinks Science Olympiad provides opportunities for all things STEM and creates a pipeline of interest in districts from sixth to twelfth grade.

“

We are incredibly proud of how our team represented Parklane Academy on the national stage. The quick response from our parents as well as school community in fundraising to get our team to Michigan shows just how important this opportunity was to all of us.

The Science Olympiad program has provided our students with opportunities to excel academically and at the same time foster a deep sense of camaraderie and school spirit.

”

**JILL JACKSON**

*HS Principal,*
