

# SCIENCE OLYMPIAD *is for* **Hosts**

If you're searching for effective ways to fill the **STEM talent pipeline**, look no further than

Science Olympiad. Our program allows students to try on a variety of sciences for size and develop soft skills like teamwork, collaboration and problem solving. Hosting a Science Olympiad tournament brings hundreds of students to campus, where they interact with faculty, experience your facilities and consider a future STEM pathway with your logo on their t-shirt! Students regularly say that the experience of visiting a campus for a Science Olympiad tournament was the deciding event in choosing a 2- or 4-year college.

“The support that UNLV is showing by being involved in this competition is extraordinary. Having teams step foot on campus, spend the day there, having event supervisors who are actual students in either the undergrad or graduate programs and even some professors participate in events — that was outstanding for the students to have that experience.”

**TRACY VISCOSI**

*Nevada Science Olympiad State Director*

**SCIENCE  
OLYMPIAD  
IS FOR YOU**

Find out how University of Nevada Las Vegas welcomes Science Olympiad students to campus for the Nevada State Tournament.

## SCIENCE OLYMPIAD ALUMNI NETWORK

Science Olympiad doesn't stop in senior year of high school. There are now 53 Science Olympiad College Alumni Chapters on top campuses across the US, like Caltech, Stanford, Cornell, Michigan, Texas A&M, University of Chicago, Harvard, Princeton and Yale. Undergrads and graduate students founded these clubs to host tournaments, perform community service and provide opportunities to showcase each campus' faculty and facilities.

“

Our alumni chapter has offered us opportunities to connect with people in our fields of interest and has allowed us to provide guidance and support to future SO alumni. We are always excited to see the impact our alumni have!”

”

**POOJA YALAVARTHI**

*President,*
